

NEWS LETTER

Over the last year I have been concentrating my efforts at the observatory on introduction and operation of a number of technologies in preparation for the Lakehead University's Physic's Operational Astronomy class. Now that the first pilot semester is successfully coming to a close, I plan to re-instate the TBOB NEWS LETTER. If your interested in getting this publication...please send me an email with your email address. Also you can create a member login account on this website and you will automatically be added to the distribution. Your name can be removed at any time...and there is no fear that you will be spam'd :) Newsletters usually contain

- Dates of Public Viewing Nights
- Updates on technology
- Changes at the observatory
- Things to watch for locally in the sky
- Other astronomy activities.

Clear Skies...

Randy
